Forecast for Saturday 14 Sep 2024

Weather: Any shallow fog in the valleys around dawn soon clearing, then a dry day with variable amounts of cloud but often bright with periods of sunshine, hazy at times. Feeling warmer than of late.

Chance of cloud-free hill tops above 600m: 60%, becoming 90%.

Low cloud and visibility: Patches of cloud may obscure some hills above 500m until mid-morning, but thereafter any cloud should be above the summits. Generally very good visibility but locally poor in any cloud and/or early valley fog.

Meteorologist's View

A fine day for hill walking and generally feeling a bit warmer than of late. Quite breezy on the highest summits though and still feeling a bit cool on exposed ridges and summits, so remember to take an extra layer or two if venturing to the tops.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Fri 13 Sep 2024	0.2mm	2.6mm	7.4mm

Forecast for Sunday 15 Sep 2024

Weather: Another mainly dry day is expected and whilst cloudier than on Saturday, occasional bright intervals are still possible. Periods of hill fog may affect some hills though, especially later in the day with a few showery outbreaks of rain possible by the evening.

Maximum wind: Southwesterly 20-30 mph.

Chance of cloud-free hill tops above 600m: 60% becoming 40%.

Low cloud and visibility: Patches of cloud above 600-700m during the morning becoming lengthier periods above 500-600m by the evening. Very poor visibility in cloud, otherwise generally good visibility.

Temperature: **Valleys:** Plus 10 Celsius rising to plus 16 Celsius.
At 600m: Plus 9 Celsius rising to plus 12 Celsius.
Freezing level: Above the summits.
